

Cyber security insurance compliance review

From assessment to implementation, we have the knowledge and solutions to secure the coverage you need - so you can focus on your business.

Cyber attacks and breaches are increasing, becoming more costly and damaging. Because of this, organizations have had to refocus their cyber security efforts to ensure compliance in order to qualify for cyber insurance. We are ready to help by reviewing your current practices and providing key recommendations based our in-depth experience assessing and managing cyber security risk.

Are you cyber insurance complaint? There are several critical security measure that are required.

Backups

Regularly backup data to an 'offline' location outside your live environment with recoverability testing.

Multi-factor authentication

Use MFA for cloud email account access and for all remote access to your network.

Remote access

Mandatory VPN (Virtual Private Network) for remote access into your environment.

Cyber security awareness training

Regular training, including anti-phishing, to all who have access to your network or data.

Patching & maintenance

Implement critical patches and update systems, and do not use any unsupported/ "end of life" software.

Email security

You continuously scan incoming emails for malicious attachments and/or links.

Anti-virus

All your devices are protected with anti-virus, anti-malware, and/or endpoint protection software.

Engagement overview

Activities	 We will review your environment and confirm compliance with general cyber security requirements and best practices
	 We will conduct a brief interview with key stakeholders and both a physical and remote review of your technology environment
	 In the event of any non-compliance, we will provide remediation recommendations along with the cost to resolve the identified issues
Deliverables	 After the review is completed, a detailed report is compiled that will identify if general requirements are met or if there are any gaps
Pricing	\$1,500 (additional fees for multiple locations)

The 5 things we need to complete your review

- 1. Administrator access to your IT environment
- 2. 30 60 minutes with key stakeholders to interview and answer questionnaire/ad-hoc questions as required
- 3. Physical and remote access to the business (physical access may be necessary to perform the review)
- 4. Access to current IT provider (if applicable)
- 5. 30 60 minutes with key stakeholders to present findings and answer questions

Your complete compliance journey
