

Adobe Experience Manager (AEM) website health check

This deep dive analysis will give you data-backed recommendations to optimize your AEM-powered website and accelerate growth.

Unlock key insights for your website

Are you struggling to understand how your AEM site is really performing? Our AEM website health check gives you the clarity you're looking for without needing credentials, source code, or environment access.

Simply provide us with several priority URLs on your website, and our experts will conduct a comprehensive audit of your live AEM site (6.5 or Cloud Service). Looking at key areas such as security, GEO and SEO visibility, accessibility, and overall performance, our team will provide a detailed, high-quality report outlining where you're accelerating, where risks exist, and what should be addressed next.

The process is seamless, with no disruption or configuration changes required, and delivers clear, actionable recommendations that your team can act on immediately or with our support. Move forward with confidence, backed by expert insights and guidance.

Areas of evaluation

- ✓ Speed & overall performance
- ✓ Security gaps & risks
- ✓ AEM gaps & posture
- ✓ GEO, SEO visibility & crawlability review
- ✓ Accessibility & compliance standards (WCAG 2.1 AA)
- ✓ Prioritized recommendations & actionable tasks for next steps
